Sharmarke Mohamed Ibrahim

Computer Engineering | Software Development | AI & Computer Vision

sharmachannel@gmail.com | Istanbul, Türkiye
GitHub | LinkedIn | Portfolio

Education

Istanbul Arel University Istanbul, Türkiye
B.Sc. in Computer Engineering (English)
Relevant coursework: Machine Learning, Computer Vision, Embedded Systems, Database Management, Data Structures.

Technical Skills

Languages: C, C++, Python, Java, C#, JavaScript, TypeScript, SQL, PHP
AI & Computer Vision: OpenCV, YOLOv8, MediaPipe, EasyOCR, PyTorch, scikit-learn, Sentence-Transformers
Systems: POSIX threads (pthreads), multithreading, Linux/Bash, SIMD/AVX2 concepts, performance profiling
Web & Backend: FastAPI, React, Java Spring Boot, ASP.NET Core, Laravel, REST APIs
Databases & Tools: PostgreSQL, MySQL, SQLite, Docker, Git, GitHub

Selected Projects

Parallel Log Analyzer & C++ Concurrency Engine C++, AVX2, POSIX Threads, Linux

- Developed a parallel log-processing engine designed to analyze high-volume log files using multithreaded workers.
- Explored SIMD/AVX2 vectorization and concurrent queue designs to reduce processing overhead; performance claims should be supported with reproducible benchmarks.

Plate Vision: License Plate Detection & OCR Python, YOLOv8, OpenCV, EasyOCR, SORT

- Built a computer-vision pipeline for vehicle and license-plate detection, multi-object tracking, and text extraction from video.
- Integrated SORT tracking to maintain vehicle IDs across frames and output structured recognition results.

MatchPoint: Semantic Talent Intelligence Platform FastAPI, React, Sentence-Transformers, PostgreSQL

- Developed a full-stack concept that represents CV text as 384-dimensional embeddings using `all-MiniLM-L6-v2`.
- Designed explainable candidate-to-role matching using weighted cosine similarity and visual skill-gap diagnostics.

Multi-Model Machine Learning Classification Pipeline Python, scikit-learn, pandas, NumPy, SMOTE

- Built a classification workflow covering preprocessing, feature scaling, class-imbalance handling, and model evaluation.
- Compared models including Random Forest, SVM, Naive Bayes, and Decision Tree using precision, recall, and ROC-AUC.

Mubarak Marketplace & BitPost AI SaaS Spring Boot, Laravel, ASP.NET Core, MySQL, Docker

- Worked on web-platform concepts involving product catalogs, role-based authentication, and database-backed application features.
- *Before submitting: split these into separate projects and specify your individual contribution if they are distinct applications.*

Professional Experience

Software Developer Intern February 2026 – June 2026
Scramble Bit Istanbul, Türkiye

- Contributed to software development work during a full-time/part-time internship. *Replace this line with 2–3 specific, verified responsibilities, technologies, and outcomes before applying.*

Sales Associate JUNE 2023 – SEP 2023
MediaMarkt Istanbul, Türkiye

- Advised customers on electronics, explained product features, supported purchase decisions, and assisted with transactions and basic setup/troubleshooting.

Leadership, Awards & Service

- **1st Place Winner**, Bursa AKOM Engineering Challenge August 2026
- **Defense Liaison (Mihmandar)**, SAHA EXPO 2026 — supported coordination for international defense delegations across 74 countries.
- **VIP Operations Secretariat**, UN-partnered Global Zero Waste Summit 2026 — supported operations involving 120+ international ministerial delegations.
- **President, UASI Student Council**; member of university Embedded Systems and Programming Clubs 2023–Present
