Sharmarke Mohamed Ibrahim

Istanbul, Türkiye | sharmachannel@gmail.com | sharmarke2026.vercel.app | github.com/sharmarke | LinkedIn

Education

Istanbul Arel University Istanbul, Türkiye
Bachelor of Science in Computer Engineering (English)

Relevant Coursework: Machine Learning, Computer Vision, Embedded Systems, Database Management, Data Structures.
Languages: English (Cambridge C1 Proficiency), Turkish (Proficiency), Somali (Native).

Technical Skills

Core Languages: C, C++, Python, Java, C#, JavaScript, TypeScript, SQL, PHP
AI & Computer Vision: OpenCV, YOLOv8, MediaPipe, EasyOCR, PyTorch, scikit-learn, Sentence-Transformers
Systems & Concurrency: AVX2 SIMD Hardware Acceleration, POSIX Threads (pthreads), Multithreading, Linux/Bash
Web, Cloud & DB: FastAPI, React.js, Java Spring Boot, ASP.NET Core, Laravel, Docker, PostgreSQL, MySQL

Selected Engineering & Research Projects

Parallel Log Analyzer & C++ Concurrency Engine *C++, AVX2 SIMD, POSIX Threads, Linux*

- Engineered a high-throughput parallel log parser leveraging AVX2 SIMD vector instructions for hardware-level vectorization.
- Implemented lock-free concurrent queues and multi-threaded worker pools to analyze high-volume log streams with minimal lock overhead.

Plate Vision: Real-Time License Plate Detection & OCR *Python, YOLOv8, OpenCV, EasyOCR, SORT*

- Built an end-to-end computer vision pipeline using custom-trained YOLOv8 models for real-time vehicle and plate localization.
- Integrated SORT multi-object tracking to persist tracking IDs across frames; extracted alphanumeric text under sub-100ms latency.
- Developed a companion driver drowsiness monitor evaluating deep learning face tracking against Eye Aspect Ratio (EAR) heuristics.

MatchPoint: Semantic Talent Intelligence Platform *FastAPI, React.js, Sentence-Transformers, PostgreSQL*

- Built a full-stack platform mapping unstructured CV text into 384-dimensional dense vectors using `all-MiniLM-L6-v2`.
- Developed an explainable matching engine using weighted cosine similarity and multi-axis radar charts for skill-gap diagnostics.

Multi-Model ML Classification Pipeline *Python, scikit-learn, SMOTE, pandas, NumPy*

- Implemented an end-to-end machine learning workflow featuring automated data preprocessing, feature scaling, and SMOTE oversampling.
- Conducted comparative benchmarking across Random Forests, SVMs, Naive Bayes, and Decision Trees using Precision, Recall, and ROC-AUC.

Mubarak Marketplace & BitPost AI SaaS *Java Spring Boot, Laravel, Docker, ASP.NET Core, MySQL*

- Developed a full B2B e-commerce platform using Java Spring Boot with role-based JWT auth, product catalog, and payment integration.

Professional Experience

Software Developer Intern *feb 2026 – june 2026*
Scramble Bit *Istanbul, Türkiye*

Honors, Awards & Executive Leadership

1st Place Winner – Bursa AKOM Engineering Challenge *August 2026*
Defense Liaison (Mihmandar) – SAHA EXPO 2026 (Coordinated defense delegations across 74 countries) *2026*
VIP Operations Secretariat – UN-Partnered Global Zero Waste Summit (120+ international ministerial delegations) *2026*
Executive Leadership – President of UASI Student Council | Member, Embedded Systems & Programming Clubs *2023 – Present*
